4G signal. I need it here but it ends over there. - [Solved]

2019/09/18

Hello all, not sure this is the right category or even the right forum but here goes. My house is in the country, 100 feet inside the woodline at the top of a farmer's field. When standing at the woodline (my property line) I have 5 bars of 4G service. I barely have 1 bar at my house. Is there an antenna setup for this situation? I'm imagining an antenna at the woodline, an underground cable to an antenna at my house to broadcast the signal. Thanks Jesse
